### City of Minnetonka Public Works Department

11522 Minnetonka Blvd.  
Minnetonka, MN 55305  
952-988-8400

The City of Minnetonka will be installing a new sanitary sewer manhole on the Metropolitan Council's sewer interceptor line in the southeast corner of Covington Park in the spring of 2023. Sewer manholes provide city staff access to sewer pipes and this manhole is critical to relieve potential sanitary sewer backups in the future.

The contractor will access the construction site from the Covington Park parking lot and travel along the east side of the park (red and blue paths below) to the proposed manhole location (blue square below).

**Tree Removal** – This project requires removing the trees within the blue Clearing and Grubbing area shown above. These trees are located within the Park or an existing sanitary sewer easement. The contractor will make every effort to save significant trees within the construction area.

**Schedule** - The tree removal is currently scheduled to occur in February-March with manhole installation to follow in April-May.

- Contact Utilities Operations Engineer Mike Kuno at 952-988-8410 or [mkuno@minnetonkamn.gov](mailto:mkuno@minnetonkamn.gov) to ask questions and learn more.
