

PROJECT INSTRUCTIONS

Waste, Vent and Water

The permit review timeline is dependent on several factors, including the number of permits under review at any given time and the completeness of those permit applications. To ensure your application is complete, **please note:**

RESIDENTIAL: includes single-family, duplex side-by-side or stacked, and two-unit townhome or condominium buildings

- ✓ All plumbing waste and vent piping material must be as per MPC table 4714.701.1 and sized per MPC 4714.703 and table 702.1 and table 703.2.
- ✓ All water pipe material must be as per MPC table 4714-604.1 and sized per MPC 4714.610 and table 610.3 and table 610.4 and table 610.10.
- ✓ All buildings are subject to MPC 4714.

COMMERCIAL: includes three or more unit townhome and condominium buildings apartment buildings, and institutional, office, commercial and industrial buildings.

- ✓ All plumbing waste and vent piping material shall be as per MPC table 4714.701.1 and sized per MPC 4714.703 and table 702.1 and table 703.2.
- ✓ All water pipe material shall be as per MPC table 4714-604.1 and sized per MPC 4714.610 and table 610.3 and table 610.4 and table 610.10.
- ✓ All buildings are subject to MPC 4714.
- ✓ Submit a complete set of interior plumbing plan view and riser diagram drawings showing all connections, routes and elevations. Include drawings showing all connections, valves, equipment etc. for the complete waste vent and water systems. ALSO include all/any material submittals, shop drawings etc. for all proposed materials to be installed.
