The city of Minnetonka is beginning a feasibility report for consideration of a new trail along Minnetonka Boulevard from The Marsh to Fairchild Lane.

PROPOSED PROJECT SURVEYING BEGINS IN JULY

A surveying crew from the city's consultant engineer, Bolton & Menk, will be in your area to start collecting data for this project beginning in July.

To prepare, private utility companies will begin marking phone, electric, and other underground utility locations with paint to make it possible for the surveyors to collect location information.

The data collected throughout this process will be used to prepare a feasibility report, which is expected to be completed in 2020.

If approved, construction is tentatively scheduled for 2022.

IF THIS PROJECT IS APPROVED, WILL I BE ASSESSED?

No. If the project is approved, it will be primarily be funded through the Gas Franchise Fee. The city will also work with Hennepin County and other agencies to pursue additional funding opportunities.

STAY TUNED FOR NEIGHBORHOOD MEETING

Once data is collected, city staff will schedule a neighborhood meeting to share details about the proposed project, answer questions, address concerns and gather feedback. Stay tuned for details.
