**City of Minnetonka
Engineering Department**
14600 Minnetonka Blvd
Minnetonka, MN 55345
952-939-8206
engineering@minnetonkamn.gov

The City of Minnetonka is proposing a street and utility reconstruction project in 2022 and 2023 in the Tonka-Woodcroft Neighborhood, which includes all streets south of Minnetonka Boulevard between Larchwood Drive and Steele Street. See the reverse side for a map of the proposed project area.

PROJECT SURVEYING TO BEGIN

Surveying in the proposed project area, which includes collecting field measurements and survey information, is expected to begin the week of August 24 and continue through fall. Surveying will be conducted by the city's engineering consultant, Bolton & Menk, and is weather-dependent.

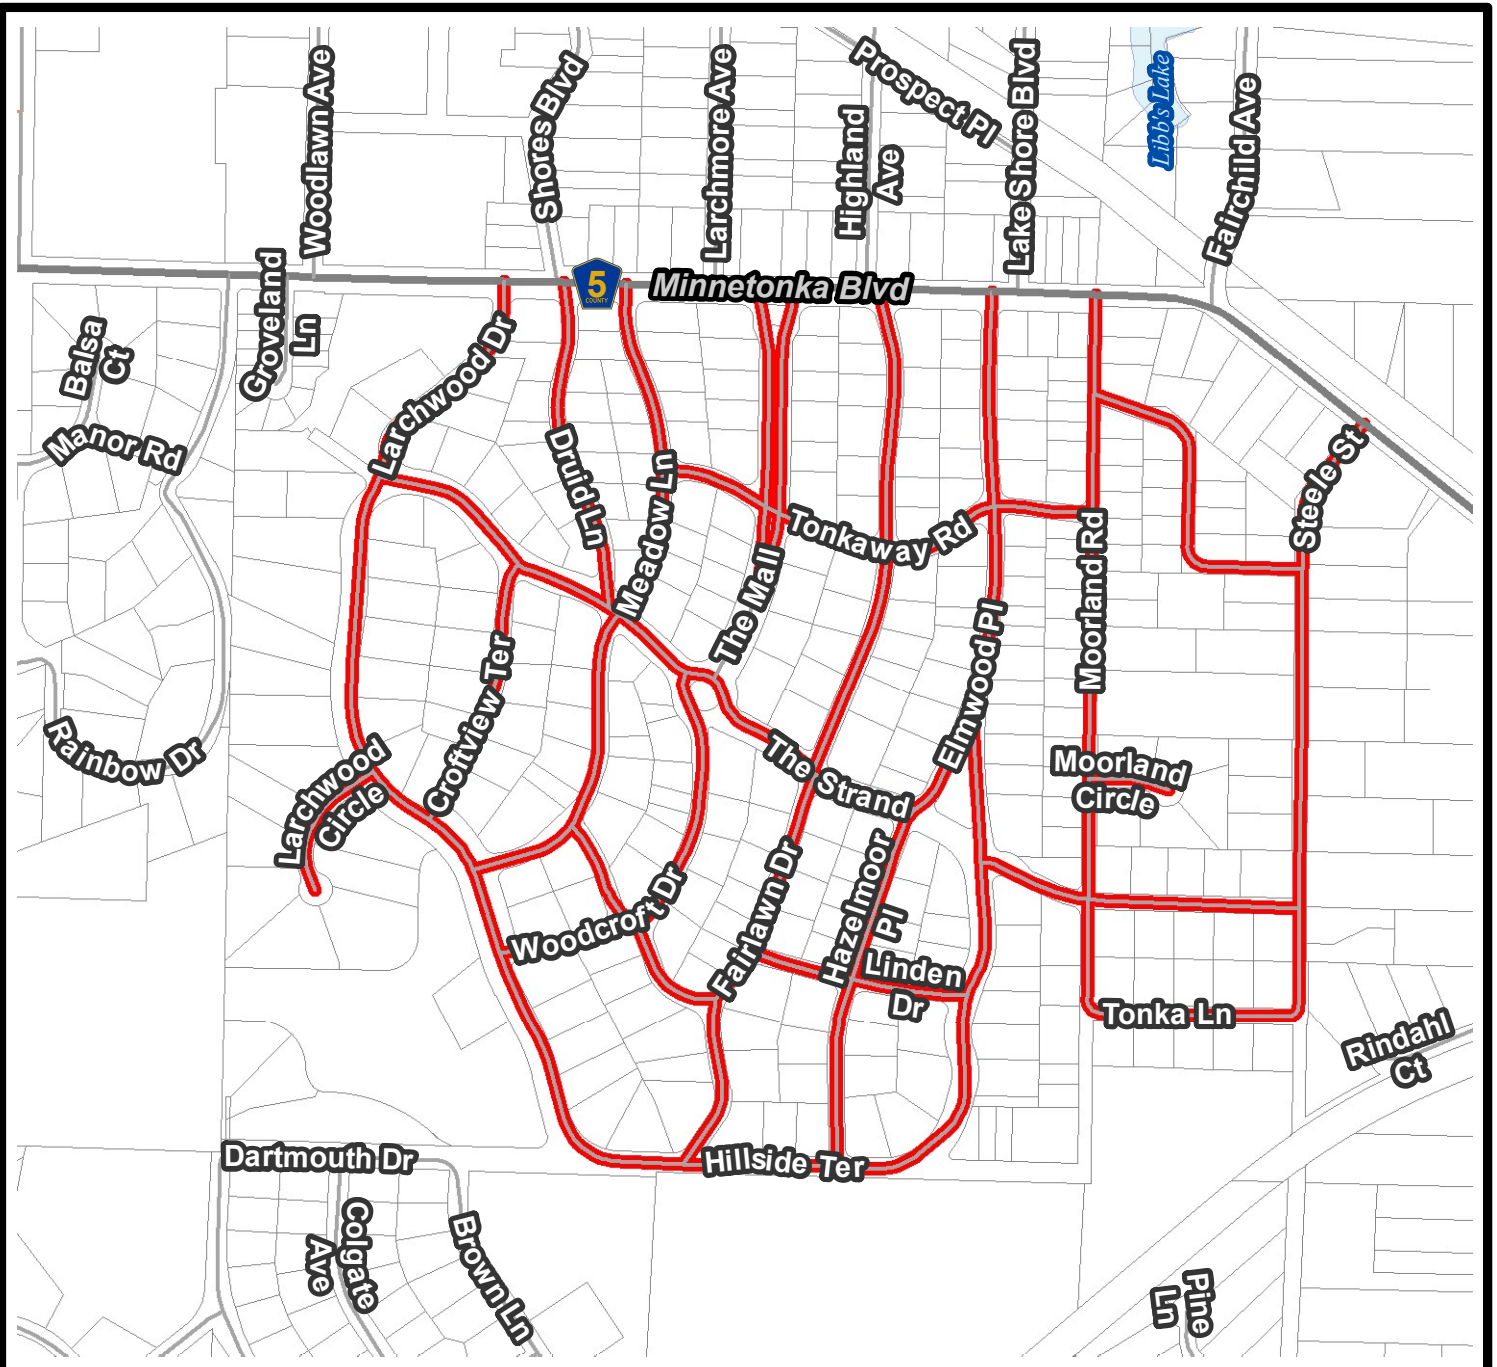

Surveying will be primarily conducted from the street, but may take place in yards, driveways, and parking lots. Underground utilities will be temporarily marked with flags or paint. **Please leave these markers in place until survey crews have completed work in the area.**

Once surveying is complete, staff will begin working on a preliminary design and project schedule in preparation for an informational open house in 2021.

Please follow social distancing guidelines and **do not approach anyone completing field work in the project area**. Instead, contact city staff to ask questions or learn more about the project. During the COVID-19 pandemic, the health and well-being of our community is our top priority. Thank you for your help to slow the spread of coronavirus.

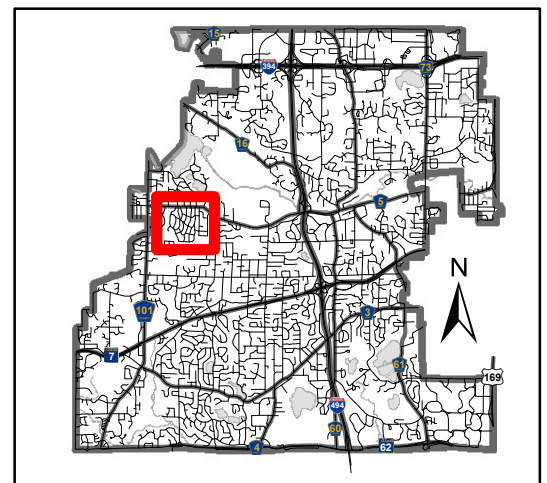

HOW TO STAY INFORMED

- Visit minnetonkamn.gov/tonka-woodcroft to subscribe to project updates via email and/or text. Stay tuned to the project website for updates and more information.
- An informational open house will be scheduled in 2021. Stay tuned for details.
- Contact Engineering Project Manager Mitch Hatcher at 952-939-8232 or mhatcher@minnetonkamn.gov to ask questions or learn more.
